
OfficeBench 1-20/3, gemma4-31b, Bangla (genuine Bangla failure: name case)
Name appears only in Bangla script; agent writes "bob"
list_emails("bob") → "No emails found"
Empty result accepted; no retry with "Bob"
Answers "no, 0" → fail
OfficeBench 1-15/0, gemma4-31b, Bangla (tool / environment: reply cap)
Plans to resend the whole 12.9k-character document
Action exceeds the reply cap → rejected as malformed
Same long write retried 14 times
Step limit, no write → fail
WorkBench email:41, gemma4-31b, Bangla (genuine Bangla failure: relative date)
"Last week" grounded as rolling 7 days
Windowed searches return nothing
Undated search finds both emails; agent rejects them
No forward_email → fail
τ²-bench airline 19, gemma4-31b, Bangla (simulated user)
Plan and policy check match the English run
Agent asks the user to confirm
Simulated user confirms and ends the chat in the same turn
cancel_reservation never called → fail
task-level step
execution-level step
control (verify, retry)
